

## Registration & Vaccination

Just one day after the project launch, TSPCA's volunteers, most of them being from Rajamangala University of Technology Tawan-Ok and TSPCA's staff were together to be actively engaged in the field work; they met people in all walks of life by knock-at-the-door along the windy streets of Sichang Island to encourage them to come out for TSPCA's service. It is interesting to note that 253 pet animals in Koh Sichang were earlier registered with 206 dogs and 47 cats for vaccination against rabies and other dangerous animal-related diseases while 39 pet animals were registered for sterilization.
